KOREA DESK

The Korea Desk is one of the most prominent among TozziniFreire's Foreign Desks

With over two decades of experience working with Korean companies, we have provided consulting on significant Korean investments in Brazil. Our work is widely recognized in the market, consolidating our position as a benchmark in supporting Korean companies in their business endeavors in the country and reinforcing relations between Korea and Brazil in strategic discussions involving areas of mutual interest.

We assist major Korean conglomerates and a variety of clients from diverse sectors of the economy, including electronics, automotive, financial, steel, heavy industry, mining, shipping, import and export, pharmaceuticals, chemicals, and consumer goods.

Partner Shin Jae Kim directly coordinates this Desk and also leads the entire Asia Practice Group at TozziniFreire.

RECOGNITION

FOREIGN DESKS

To help clients respond faster and more effectively to the increasing business opportunities between Brazil and others key existing trade partners and specific fast-growing economies, our firm pioneered the creation of foreign desks in Latin America, composed of professionals dedicated to these major trade and investment destinations. Starting with our Asian initiative (comprising our China, Korea and Japan desks) and fast developing towards other markets (German-speaking countries, Portugal, Italy and Latin America), these unique knowledge centers are staffed with professionals familiar with the culture, legal and business practices of each region, and who are charged with keeping up-to-date with bilateral trade relations developments between Brazil and those countries.
